

Effective Health Care

Vasculitic Neuropathy

Nomination Summary Document

Results of Topic Selection Process & Next Steps

- Vasculitic neuropathy is too broad to develop given limited program resources. No further activity will be undertaken on this topic.

Topic Description

Nominator: Individual

Nomination Summary: The nominator expresses interest in treatments for vasculitic neuropathy.

Key Questions from Nominator: 1. For patients with vasculitic neuropathy, is there treatment besides steroids?

Considerations

- The topic of vasculitic neuropathy is very broad because numerous underlying conditions may be associated with the development of vasculitic neuropathy. This topic could not be evaluated due to insufficient information given in the original nomination. Specifically, the population, interventions, comparators, and policy and/or clinical context are undefined.
- Vasculitic neuropathy is inflammation of the blood vessels supplying peripheral nerves. Further information on this and other peripheral nerve disorders is available from the National Institutes of Health at: <http://health.nih.gov/topic/PeripheralNerveDisorders>.
